### **DETAILED ACTION**

1. This action is responsive to the Amendments filed on April 3<sup>rd</sup> 2006. Claims 1, 13, 19, 20, and 21 have been amended. Claims 7-12, and 14-15 have been canceled. Claims 1-6, 13, and 16-22 remain pending and are presented for examination.

### **EXAMINER'S AMENDMENT**

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
3. Authorization for this examiner's amendment was given in a telephone interview with Mr. William S. Galliani on June 21, 2006.
4. The application has been amended to remedy an issue of non-statutory subject matter under 35 U.S.C. 101, in the manner presented below.

### **IN THE CLAIMS**

Please amended claims 19 and 20 as follow:

#### **Claim 19 (currently amended),**

at line 1, please delete "A computer program product" and insert --A physical computer program product-- therefor.

Art Unit: 2192

Claim 20 (currently amended).

at line 1, please delete "A computer data signal embodied in a transmission medium" and insert --A physical computer usable medium—therefor.

***Allowable Subject Matter***

5. Claims 1-6, 13, 16-22 are allowed.

6. The following is an examiner's statement of reasons for allowance:

All independent claims 1, 13, 19, 20, and 21 have been amended to recite at least and/or require "... a *multi-tasking embedded processor, said **multi-tasking embedded processor** including ... trace generation logic that is operative to periodically **generate trace synchronization information**, wherein said trace synchronization information is periodically generated **in accordance with specified information**; wherein **said specified information includes fields to specify an instruction set architecture***".

As Applicant pointed out on page 6, under Remarks section, prior art of record does not teach, or suggest a *multi-tasking embedded processor including trace generation logic to generate trace synchronization information based on fields specifying an instruction set architecture*, as claimed.

Art Unit: 2192

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
